MONITOR COLOR CORRECTION

BEFORE

AFTER

There's a reason your blues aren't always true. Same goes for your reds, greens and every color in-between. What you're seeing onscreen isn't necessarily accurate – it all depends on your monitor. **huey** will correct the color on virtually any monitor for brilliant life-like colors in digital photos, computer gaming graphics, digital movies and Web-browsing.

huey, the newest gadget for any consumer or photo enthusiast looking for absolute monitor color, provides an easy-to-use solution that automatically adjusts the color of the monitor so what you see is true. Everything becomes more accurate and predictable: digital photos as you expect, game graphics that give you the intense edge and details you're after, digital computer movies with brilliant life-like color and a web-browsing experience that delivers colors that you can trust.

huey is based on GretagMacbeth's technology for professional-level products and delivered in an easy-to-use, affordable device – a true breakthrough in terms of form, function and usability. **huey** is distinctly different from professional monitor calibration tools on the market that require a basic understanding of color management to operate. Plus, it is the only device that continually adapts a monitor for changing room lighting.

huey offers:

- Accurate color correction for LCD, CRT and laptops
- High quality results – based on professional level GretagMacbeth technology
- Cutting-edge ambient light technology - ensures your monitor remains consistent as room lighting changes
- Revolutionary ease-of-use – wizard software guides you through every step for accurate on-screen color in minutes

In less than five minutes, **huey** can calibrate your monitor and adjust it based on your primary viewing activity – viewing photos, playing games, creating graphics or browsing the Web. With an extremely affordable price tag, **huey** delivers accurate onscreen color, a crucial component for anyone who cares about color fidelity.
